Kota Tangerang, Banten

Software Engineer with experience building scalable web and mobile applications using React, Flutter, Laravel, PHP, and REST APIs. Experienced in developing inventory management, warehouse monitoring, company profile, and e-commerce systems with a focus on clean architecture, performance, and user experience. Passionate about delivering reliable software solutions that solve real business problems.

EDUCATION

AMIKOM UNIVERSITY

2022-2026

Information Systems - 3.38/4.00

- Focused on software engineering, system analysis, database management, and application development through academic and practical projects.

SMK ISLAMIC DEVELOPMENT NETWORK

2020-2022

RPL / Software Engineering

- Learned software engineering fundamentals including programming, databases, web development, and software design principles through project-based learning.
-

WORK EXPERIENCE

PT Putra Bangun Rubberindo – Indonesia

Jun 2025 – Nov 2025

Software Engineer Intern

- Developed and maintained a web-based inventory monitoring system using React.js and REST APIs, streamlining stock tracking and warehouse operations for over 30 internal users.
- Built cross-platform mobile applications with Flutter, connected to the same backend APIs to provide consistent inventory and goods management across web and mobile platforms.
- Developed inventory management features integrated with MySQL databases, enabling real-time stock updates and improving data accuracy.
- Collaborated with a team of 4 software engineers to design, develop, and deliver both web and mobile applications, while working closely with stakeholders to translate business requirements into technical solutions.
- Optimized application performance and usability by improving interface responsiveness and reducing unnecessary loading times, resulting in a smoother user experience.

PT Ayu Arta Group – Indonesia

Sep 2024 – Feb 2025

IT Staff & SEO Analyst Intern

- Developed and deployed a responsive company profile website using React.js, ensuring a consistent user experience across desktop and mobile devices.
- Implemented SEO best practices to improve website visibility, search engine indexing, and overall web performance.
- Independently designed and developed a full-stack financial management system using React.js, Laravel, and MySQL, enabling multiple departments to manage daily financial operations through a centralized platform.
- Built core features including authentication, role-based access control, dashboards, income and expense management, financial reporting, data visualization, and PDF/Excel export.
- Managed application deployment and maintenance while collaborating directly with stakeholders to translate business requirements into scalable software solutions.

CV Tjal Teknologi Studio – Indonesia

Software Engineer Intern

- Developed frontend features for a B2B office supplies e-commerce mobile application using Flutter, Dart, GetX, and REST APIs, focusing on the product catalog module.
- Transitioned from the mobile development team to the web development team to support an accelerated product launch, contributing to frontend development using React.js, Tailwind CSS, Context API, Axios, and REST APIs.
- Built responsive and reusable user interface components for the product catalog, ensuring a consistent experience across multiple devices and browsers.
- Collaborated with a cross-functional development team of 6 software engineers using Trello to manage tasks, track progress, and deliver features within project timelines.
- Worked closely with backend developers to integrate REST APIs and ensure accurate data synchronization between frontend applications and backend services.

PT Global Future Technologies – Indonesia

Jun 2021 – Nov 2021

Web Developer Intern

- Independently developed a responsive professional profile website for lawyer Arjana Bagaskara Solichin using HTML, CSS, and JavaScript, delivering a modern user experience tailored to client requirements.
- Built key website features including practice areas, articles, gallery, consultation, and contact pages, ensuring responsive design and cross-browser compatibility.
- Collaborated with a team of 3 developers to develop the official profile website for Partai Demokrat, contributing to responsive frontend implementation using HTML, CSS, and JavaScript.
- Developed core website sections including news, organizational structure, events, gallery, and contact pages, ensuring a consistent user interface and intuitive navigation.
- Worked closely with team members and stakeholders to deliver projects on schedule while maintaining code quality and responsive design standards.

SKILLS, ACHIEVEMENT, & OTHER EXPERIENCE

TECHNICAL SKILLS

- **FRONTEND** : React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Axios, Context API
- **BACKEND** : Laravel, PHP, REST API, MySQL
- **MOBILE** : Flutter, Dart, GetX
- **TOOLS** : Git, GitHub, Postman, Figma, Trello
- **CONCEPTS** : Responsive Web Design, Component-Based Architecture, REST API Integration, State Management, Cross-Browser Compatibility

SOFT SKILLS

Problem Solving, Team Collaboration, Communication

LANGUAGES

- English (Intermediate)
- Indonesian (Native)

ACHIEVEMENT

- UI/UX Design Competition Favorite Winner – Designed a student savings application with a focus on usability, user flow, and intuitive interface design. The project was evaluated based on user experience, design clarity, and problem-solving approach.
- Top 10 Finalist & Funding Recipient – (Dogies) Anti Sexual Harassment Application – Developed an Android-based application for preventing and reporting sexual harassment, successfully selected for funding due to its social impact and solution relevance.
